February 2017

Wednesday, 22 February 2017, 12 noon To 2 p.m.

General Meeting

CVGS ANNUAL MEETING AND SHARING

Chula Vista Civic Center Branch Library (365 F Street, Chula Vista, CA 91910)

The February general meeting on 22 February will be our Annual Meeting. At this time, the 2017 budget will be presented to the membership for a vote of approval. The membership will also receive a synopsis of the activities for the last year.

Gary Brock will present a slide show of many of our activities in 2016, courtesy of photos by Patricia Diane Godinez. Come and see yourself on the big screen.

At the end of the formal meeting we will share our 5-generation pedigree charts with each other. See how many people you can find who share your surnames and had ancestors in the same areas as yours. The sharing will be while we enjoy refreshments. I wonder how many new cousins we can find?

Be sure you bring a copy of your 5-generation pedigree chart so you can leave it with a board member to be included in a notebook which will be kept in the library for future reference. There will be extra copies of the chart at the meeting (or email Randy Seaver for one at randy.seaver@gmail.com).

President's Message – by Ceasar Castro

The CVGS Board meets once a month on the first Wednesday of each month. I generate an agenda and each Board member provides a status of their particular area. There are 14 members on the board and the meeting takes about two hours. Besides the normal topics like the Treasurer's report, new items are also brought up. We have tentatively decided to have a General meeting on a Saturday in the month of April (22 April). The purpose of a Saturday meeting is to have more participation from people who have a work schedule during the week. We will continue to look for opportunities to host Saturday meetings. Our regularly scheduled Research and Computer groups will continue to meet on Wednesdays.

The Coronado Floral Association has invited us to have a booth at their annual flower show: "Our Family Tree...Out on a Limb." It is scheduled for April 8th and 9th at Spreckels Park on Orange Avenue in Coronado. The board discussed the invitation and has decided to accept the invitation.

Growing up in Otay and Chula Vista, I have always been interested in the history of the area. In doing my genealogy I discovered that my family and relatives were involved in the early farming in the South Bay area. My Paternal Grandparents are buried at the Mount Olivet Cemetery which is in Nestor. One of my Uncles owned a grocery store in Otay. The same Uncle helped establish the Apostolic Church in Otay. Researching my local history led me to join the South Bay Historical Society. History and genealogy are interrelated as many of you have discovered.

"I am bound to them, though I cannot look into their eyes or hear their voices. I honor their history. I cherish their lives. I will tell their story. I will remember them." – Author Unknown

Please Register for Meetings on the CVGS Website

Please register for the General Meetings, the Saturday Workshops, the Research Group and the Computer Group on the CVGS website – www.CVGenealogy.org. Log in with your member ID, then click on "Events" and the Register button for each event, and follow directions. This will help with meeting planning and speaker handouts.

CVGS Email Issues, by Randy Seaver

I continue to have email issues (can't send emails to a lot of Cox subscribers), so we will try distributing a link to the Newsletter through a mass email from the society's Wild Apricot website.

Stay up-to-date on CVGS Activities

Visit the CVGS Website: <http://www.CVGenealogy.org>

Visit the Chula Vista Genealogy Cafe blog: <http://CVGenCafe.blogspot.com>

The Board Meeting and Program Meeting minutes are now posted on the CVGS website. Check them out at <http://www.CVGenealogy.org> on the "Members" tab.

Next CVGS Saturday Workshop – 4 March 2017

The March 4th Saturday Workshop will be from 1 p.m. to 4 p.m. in the Community Room at the Bonita-Sunnyside Library (4375 Bonita Road). The subject will be the “Search and Research” presented by Randy Seaver. Please bring information about one of your brick wall problems to discuss with the group. This event is free for all to attend.

Next Computer Group Meeting – 15 February 2017

The next Computer Group meeting will be on Wednesday, 15 February 2017 at the Chula Vista Civic Center Branch Library (365 F Street in downtown Chula Vista, Calif.).

Class will start at 10:15 a.m. in the Auditorium and go until 11:45 a.m. when we will break for lunch. It is called a “Beginning Computer Genealogy” group. If you have a laptop, you should bring it. Shirley Becker and Gary Brock will be demonstrating very basic computer tasks such as how to find tutorials and use them. We will move to the Computer Lab at 12:30 p.m. and stay until 2 p.m.

Lemon Grove Research Group News

The Lemon Grove Research Group now meets once a month at the Lemon Grove Branch Library (location is 3001 School Lane in Lemon Grove) from 6 p.m. to 7:50 p.m. Contact Susi Pentico (619-690-1188, SusiCP@cox.net) for more details. All are invited to attend. Beginners are welcome! Upcoming programs include:

- **Wednesday, 15 February, 6 to 8 p.m.:** “Ancestry Library Edition” by the Lemon Grove Librarian.
- **Wednesday, 15 March, 6 to 8 p.m.:** “How My Hobbies Have Branched Together” by Carole Sobke

5 Generation Pedigree Charts, by Susi Pentico

Many years ago when everything was private and no one wanted to release names and data, our new genealogy society decided a 5 Generation Chart binder would help everyone. It was kept in the file cabinet at the library where our minutes for meetings were kept for anyone wanting to read them.

Members then did not have computers or were not very savvy about using them. The charts helped members find other members who were distantly related and then they could share information. As one of five members who shared the same ancestor with others, it was how we learned that actual fact. Prior to our doing it, I only knew that Nina Schultheis was a cousin.

Today, many members use computers, but we still have many who are not proficient or savvy with them. We have fallen behind keeping the charts updated and getting them online for members to read and use. I would love to see the society set aside an afternoon every month for members to get together and pore over the contents of the binders we have.

I was looking at Phyllis Learned's binders yesterday and I know we have at least two others who should connect with data she had found prior to her demise.

I totally forgot that my cousin's husband gave me all of Vicki Porter Adams papers. I located them in the garage yesterday. More names that people could be scouring through for information. Vicki was great for sources and when she was ill I did the running and she did the documenting. She was a member of SDGS and my cousin in the Hoffman family from Greene County, as were the others mentioned above.

Lemon Grove January Meeting Review, by Cindy Cox Teysko

The group met on Wednesday evening, January 18. We were happy to host a couple of surprise visitors and enjoyed what each brought to our meeting.

Carole Sobke entertained us with an historical/genealogical presentation and slide show featuring the Heilbron House in downtown Sacramento. The house was built in 1881 in the High Victorian Italianate style, and was originally the home of Carole's ancestor, August Heilbron. The house, also known as Heilbron Mansion, has been in Carole's family for decades and has been the site of many reunions and get-togethers. Many of her ancestors are buried in nearby cemeteries and Carole is a frequent visitor to the city. The magnificent, three-story house has been lovingly maintained and was added to the National Register of Historic Places in 1976.

Currently, the property is owned by the government and is surrounded by parking lots and office buildings. The local planning commission has suggested razing or moving the venerable structure, and the family, along with other local citizens, are understandably against the idea. Comments in support of leaving the house intact in the same location can be sent to:

Stephanie Coleman, Sr. Project Manager
California Dept. of General Services, Environmental Services Section
MS 509, PO Box 989052, West Sacramento, CA 95798
(Please include your name, address, and email in all correspondence)

Our second visitor, Patrick, is new to genealogy. He shared his excitement at beginning family research with us and naturally, we got excited for him. Each one of us was more than eager to help, offer advice, and generally share information and encouragement. Gary Brock gave us a virtual tour of the CVGS website, Susi and Shirley assisted with helpful ideas and online sites to check out, and we located Patrick's father on a census record at www.familysearch.org. We are pretty sure Patrick will visit the group again as our enthusiasm for our favorite hobby was fairly obvious! Thanks, Carole and Patrick, for joining us. Please come again.

Upcoming Family Tree Webinars (www.familytreewebinars.com)

- Wednesday, 8 February, 11 a.m.: Blaine Bettinger: "The WHO of Genetic Genealogy"
- Friday, 10 February, 11 a.m.: Gail Blankenau: "Deciphering German Script"
- Wednesday, 15 February, 11 a.m.: Cyndi Ingle: "Be Your Own Digital Archivist: Preserve Your Research"
- Tuesday, 21 February, 5 p.m.: Karen Stanbary: "Weaving DNA Test Results Into a Proof Argument"
- Wednesday, 22 February, 11 a.m.: Diahann Southard: "Finding Missing Persons With DNA Testing"
- Wednesday, 1 March, 11 a.m.: Peggy Clemons Lauritzen: "Apprentices, Indentured Servants, and Redemptioners: White Slavery in America"
- Wednesday, 8 March, 5 p.m.: Gena Philibert-Ortega: "50 Websites Every Genealogist Should Know"
- Friday, 10 March, 11 a.m.: Cari Taplin: "Home on the Range: Kansas Research Tips"
- Wednesday, 15 March, 11 a.m.: John Grenham: "Why Are Irish Records so Weird?"
- Tuesday, 21 March, 5 p.m.: Rebecca Whitman Koford: "Are You My Grandpa? Men of the Same Name"

These webinars are FREE to watch live and for a week after. You must register to view them live.

January 25th Program Review

The January 25th General Meeting program was CVGS member Randy Seaver presenting “Using FamilySearch Digital Microfilm to Find Genealogical Records.”

Randy said that “digital microfilm” is the record collections that have been digitized but are not indexed. FamilySearch has indexed only about 50% of the available digital collections on their website (<https://familysearch.org/search/collection/list>). You can use the “Filter by collection name” to find records for a specific subject – some examples are “new york,” “probate,” “land,” “church,” “Mexico,” “Italy,” etc.

There are many collections that have to be browsed at this time – especially vital, church, probate, land, town, tax and other record types. Many of these are “golden” sources – original sources with primary information and direct evidence. There are over one billion “hidden” records waiting to be found.

FamilySearch has organized these “digital microfilm” collections into convenient groups – for example, surname letters, locality (state, county, town), volume numbers, and record topic (usually alphabetical). These groupings are called “waypoints” and mark the pathway to specific image groups.

Randy then provided four case studies from his own research. The four cases were:

- 1) Find James Vaux (died 1839) probate records in Erie County, New York. From the “New York Probate Records, 1629-1971” record collection, which has over 14 million images, he selected Erie from the county Waypoint list, then found a probate index on the list of county probate volumes. There may be hundreds of volumes, and each volume may have hundreds or thousands of images in each volume. Using a “guess and estimate” process, he found that James Vaux's records were in Estate File 23181. Back to the list of probate volumes, he found the correct volume and found that the Estate File 23181 had 26 images and started on image 304 of 1536.
- 2) Find James Vaux (died 1839) land records in Erie County, New York. From the “New York Land Records, 1630-1975” record collection, which has over 8 million images, he reviewed the grantor and grantee deed indexes for the time period on the list of county deed records, and found that there were several deeds in the indexes. He wrote down the deed volumes and page numbers and other information from the indexes, and then reviewed every deed volume on the list to find the deed records. In the example, James Vaux had a deed in Liber 13, page 318 of the deed records and he used the “guess and estimate” system to find the deed on image 433 of 525.
- 3) Find 1823 birth record of Isaac Seaver in Westminister, Worcester County, Massachusetts town records. For this example, Randy selected the “Massachusetts, Town Clerk, Vital and Town Records, 1627-2001” record collection on FamilySearch, which has over 1.7 million images. He selected “Worcester” in the list of county waypoints, and “Westminister” in the list of towns in Worcester County. There were 15 record volumes, and he found the birth record in one of them. Many of these town records have an index within the volume, but some don't. An index listed the family on page 312 in the original record book, but he found it on page 246 of the copied record book.

(continued on page 8)

January 11th Research Group Review

There were 16 CVGS members at the 11 January 2017 research group meeting at the Chula Vista Civic Center Library Branch.

In the first hour, Randy discussed:

- * The new book, *Stranger in my Genes*, by Bill Griffeth. Bill found out that he was adopted from a Y-DNA test. The book describes his search for his biological father.
- * Living DNA (www.livingdna.com) is a new autosomal DNA testing service. At present, it provides only ethnicity estimates, and they are focused on the British Isles.
- * Family Tree Maker announced their long-promised Update for FTM 2014/Mac 3 users - it's free to download. The update permits synchronization to an Ancestry Member Tree. There is also an upgrade coming in the next months.
- * A "2017 genealogy industry benchmark" post about online genealogy sites was posted at <http://www.geneamusings.com/2017/01/genealogy-industry-benchmark-numbers.html>.

In the second hour, the attendees discussed:

- * Shirley is working on the Greene family in Rhode Island and New York. She has about 3,000 persons in her database now, but is having computer problems.
- * Karen S. downloaded the Family Tree Maker Mac 3 update, but her latest Ancestry tree didn't sync with the FTM update. The group said that she needs to download the Ancestry tree from Ancestry, then merge it into the existing FTM tree, merge duplicate profiles, and then sync it to a new Ancestry tree.
- * Gary is reviewing his 23andMe autosomal DNA matches. He has a second cousin match with 3.8% in common.
- * Susi put some Jones information on her blog, and a distant cousin provided more Jones data.
- * Bobbie is trying to get started again. She has three goals for the next two years to research her German, English and French-Canadian ancestors.
- * Mary N. belongs to a German society, where a member said that sometimes when you contact a cousin family in Germany that they think you're trying to claim an inheritance.
- * Bette is a new member with ancestry in Messina, Italy. She found the naturalization record for her grandfather in 1904 in Boston.
- * Helen S. received an email from Wales on her son's DNA line saying that 3rd great-grandfather John Williams (1805-1851) may be from Wales.
- * Virginia received an email from a FamilyTreeDNA match on her Erdman line from PA, perhaps a 4 or 5th cousin.
- * John is helping Bea each week. They found family information in the Mexico Civil Registry, and a family member had written a book about the family. John has had some contact with a few of his over 400 DNA cousins; one said "none of your business." Another match said they were related to John Allen and Priscilla Mullins of the Mayflower.
- * JoAnn is working on her father's ancestry in England, and found great-great-grandfather John Sadler on MyHeritage and Genes Reunited trees.
- * Sam is working on sourcing the collected material from his Tennessee research trip.

The next meeting of the Research Group will be on Wednesday, 8 February at 12 noon in the Auditorium at the Chula Vista Civic Center Branch Library (365 F Street, Chula Vista, California).

RootsTech 2017 Live-Streaming Videos, by Randy Seaver

The RootsTech 2017 Conference is this week – February 8th to 11th. Some of the sessions will be live-streamed on the www.RootsTech.org website for FREE to anyone that wants to watch.

The schedule is listed below (all times PST):

1) Wednesday, 8 February 2017

- * 8:00 a.m.–9:00 a.m. | Innovator Summit General Session; Speakers: Steve Rockwood, Liz Wiseman
- * 9:15 a.m.–10:15 a.m. | Industry Trends and Outlook; Speakers: Craig Bott and Guest Panel
- * 10:30 a.m.–11:00 a.m. | Innovation—Best Practices and Applications; Speaker: Cydni Tetro

2) Thursday, 9 February 2017

- * 7:30 a.m.–9:00 a.m. | RootsTech General Session; Speakers: Steve Rockwood, Jonathan and Drew Scott
- * 10:00 a.m.–11:00 a.m. | Getting Started in Genealogy; Speaker: Kelli Bergheimer
- * 11:15 a.m.–12:15 p.m. | DNA: The Glue That Holds Families Together; Speaker: Diahan Southard
- * 12:30 p.m.–1:30 p.m. | DNA Matching on MyHeritage; Speaker: Dana Drutman
- * 2:00 p.m.–3:00 p.m. | Jewish Genealogy: Where to Look and What's Available; Speaker: Lara Diamond
- * 3:30 p.m.–4:30 p.m. | Family History Is Anything but Boring; Speakers: Crystal Farish and Rhonna Farrer

3) Friday, 10 February 2017

- * 7:30 a.m.–9:00 a.m. | RootsTech General Session; Speakers: Levar Burton, Special Guest Panel
- * 9:30 a.m.–10:30 a.m. | RootsTech Innovator Showdown Finals
- * 11:15 p.m.–12:15 p.m. | Mothers, Daughters, Wives: tracing Female Lines; Speaker: Judy Russell
- * 12:30 p.m.–1:30 p.m. | Censational Census Strategies; Speaker: Mary Kircher Roddy
- * 2:00 p.m.–3:00 p.m. | Big 4: Comparing Ancestry, findmypast, FamilySearch, and MyHeritage; Speaker: Sunny Morton
- * 3:30 p.m.–4:30 p.m. | Cross the Atlantic with Religious Records; Speaker: Jen Baldwin

4) Saturday, 11 February 2017

- * 7:30 a.m.–9:00 a.m. | RootsTech General Session; Speakers: Cece Moore, Buddy Valastro
- * 10:00 a.m.–11:00 a.m. | Journaling Principles That Work; Speaker: Steve Reed
- * 12:30 p.m.–1:30 p.m. | Don't Just Be a Searcher, Be a Researcher; Speaker: Crista Cowan
- * 2:00 p.m.– 3:00 p.m. | Creating Google Alerts for Your Genealogy; Speaker: Katherine R. Wilson

The individual videos from these classes will be available a month or two after the live event on the RootsTech website (www.RootsTech.org) throughout 2017.

YouTube Historical Videos

I found several interesting YouTube videos about history, including:

- [History of the British Isles: Every Year](#) from pre-Roman times to 2016.
- [History of Europe: Every Year](#) from pre-Roman times to 2016.
- [History of the World: Every Year](#) from 200,000 BCE to 2016.

January 25th Program Review (concluded from page 5)

- 4) Find the 8 July 1896 birth record of Maria Angeli in Bagni di Lucca, Italy. He selected the “Italy, Lucca, Lucca, Civil Registration (Tribunale), 1866-1929” record collection on FamilySearch, which had over 1.3 million images, all in Italian. The first waypoint was the town names, so he selected “Bagni di Lucca” and then found a volume that had 1896 births in it, which had 3,003 images. Before searching, Randy used Google Translate (<https://translate.google.com/?hl=en>) to list the Italian words for years, months, days, key words, etc. so that he could review the records. He found that there was a yearly index after the records for each year. He narrowed the search down to 1896, and found the birth record for Maria Angeli. A bonus was that the date of her marriage to Leone Morandi was provided in the margin of the birth record. He found that too.

Randy ended the presentation by providing some wisdom on the perils of trying to find original town, vital and church records, some lessons learned and some final thoughts. Many research problems can be solved using records on digital microfilm without going to the local FamilySearch Center or Salt Lake city. It is faster to use digital microfilm than analog microfilm, and it is easier and cheaper to capture digital images using digital microfilm than a camera at home. Users need to practice using digital microfilm so that they can do effective research. FamilySearch has tremendous resources in these browse-only collections, with much more to come.

CVGS members can download the four page handout from the CVGS website (www.cvgenealogy.org), log in with your username and password, click on the “Members” tab, and then the “Handouts” tab and then the “Program Handouts” and the handout for January 25, 2017.

Three Degrees of Separation, by Randy Seaver

Have you ever wondered about the family members that your ancestors knew? That means "you knew an ancestor, who knew another ancestor, who knew another ancestor." When was that third ancestor born? NOTE: A “degree of separation” means that person A knew or met person B.

Here's an example from my own ancestry:

- Randy (born 1943) knew his great-grandmother, A) Georgianna (Kemp) Auble (1868-1952). (Randy was the son of Fred Walton and Betty Virginia (Carringer) Seaver (1919-2002); Betty was the daughter of Lyle and Emily (Auble) Carringer (1899-1977), and Emily was the daughter of Charles and Georgianna (Kemp) Auble.)
- A) Georgianna Kemp (1868-1952) knew her great-grandfather, B) Frederick Sovereign (1785-1875) (Georgianna was the daughter of James and Mary Jane (Sovereign) Kemp (1840-1874); Mary Jane was daughter of Alexander and Sarah (Putman) Sovereign; and Alexander Sovereign (1814-1907) was the son of Frederick and Mary Jane (Hutchison) Sovereign).
- B) Frederick Sovereign (1786-1875) knew his grandfather C) Frederick Zavering (1711-1805) (the younger Frederick was the son of Jacob Sovereign (1759-1845), who was the son of the elder Frederick).

So, with three degrees of separation, I can connect to a man born 305 years ago in 1711.

Can any of our members connect to an earlier ancestor with three degrees of separation?
